

IDD-510 "Tech Side" - Week 06 - Reading and Practical Assignments

Tutorial Assignment

Please watch the following videos and do the related tutorials in preparation for next week...

- * Try jQuery Tutorial - <http://try.jquery.com/>

Please do the following interactive modules only; stop after completing the second module...

1. Introduction to jQuery
2. Traversing the DOM

Once you are finished with the second module, please send me a screenshot of your total earned points.

Reading assignment

- * Please read chapter 4 from your Duckett JS book, Decisions and Loops.

Practical Assignment

Please continue with the assignment you started in class. The page should be about an author that you like...

- * There should be a Bootstrap carousel with pics of whatever related to the author - <https://getbootstrap.com/docs/4.0/components/carousel/>
- * A jQuery UI accordion that highlights a book per accordion section - <https://jqueryui.com/accordion/>
- * Links to the author's social media and website should be in the footer or bottom section. Please use Font Awesome icons for the social media links.
- * All HTML and CSS should validate. Also, there shouldn't be any errors in the Javascript console when the page loads or when interacting with the page elements.
- * Feel free to use the web-starter project folder in the zipped archive. Deconstruct the web-finished project to see all of the code in action.

Do not attempt any plain javascript, just use jQuery and jQuery UI for now. Please keep it to one page.

- * Please upload your web project to github and send me the URL via Slack, no later than 9/30, at 5:PM.
- * Make sure to bring your coding projects with you to the next class. We will continue adding features to the project and/or have code review.

- If you have any questions, please email or text (267-207-0350) me so we can set up a time to chat.
